Overlay**Across**

2. a complete, often very fast, change
3. an interest that quickly becomes popular; a fad
4. stiff; unable to bend
7. a choice; one of the things to be selected
10. to send; to pass along
12. to force apart
13. a tiny negatively charged particle of an atom
14. actually; in fact

Down

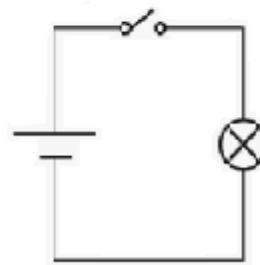

1. wasteful of effort or energy
3. material through which electricity can move
5. property of a conductor that opposes the flow of electricity and changes electrical energy to heat
6. to produce; to cause to be
8. something through which electricity does not flow
9. flow of electrical energy through wires
11. able to be counted on
